

PRASANNA M

FULL STACK DEVELOPER

Madurai, Tamil Nadu | 9750754966 | prasanna09112001@gmail | linkedin.com

PROFESSIONAL SUMMARY

Full Stack Developer with professional experience building web applications using React.js, Next.js, Node.js, Fastify, and Express.js. Skilled in JavaScript, MongoDB, Redis, REST APIs, and Web3/blockchain integrations. Hands-on experience developing trading platforms (copy trading, PAMM, spot trading, prediction markets), crypto staking systems, and e-commerce applications, with strong exposure to order matching engines, wallet integrations, and full-stack bug resolution.

EXPERIENCE

Full Stack Developer — Wealwin Technologies Pvt Ltd

Nov 2024 - Present

Madurai

- Worked as a full stack/backend developer across multiple crypto trading and prediction market platforms, using React.js, Next.js, Node.js, Fastify, MongoDB, and Redis.
- Diagnosed and resolved bugs across admin panels, user modules, and trading engines to improve platform stability and reliability.
- Designed and implemented order matching and trade execution logic, including third-party exchange integration with Bybit.
- Built prediction market functionality, including event market architecture, UMA oracle-based resolution systems, and automated crypto and sports market creation.
- Implemented blockchain/Web3 features such as custodial wallet integration, deposit/withdrawal processing, and Alchemy webhook-based fund tracking.
- Wrote unit tests using Jest to validate core trading and matching engine logic.

Full Stack Developer — JLVN Tech Solutions

Feb 2024 - Oct 2024

Madurai

- Developed a trading analytics and playbook platform using Next.js and Material UI, integrating trading data from multiple platforms including MT4 and MT5.
- Implemented private/public profile visibility controls and a responsive dark/light theme system with persistent user settings.
- Built a full stack e-commerce platform using React.js, Node.js, Express.js, and MongoDB, covering product listings, shopping cart, checkout, and account management.
- Collaborated across frontend and backend development to deliver responsive, production-ready web applications.

PROJECTS

Finowiz — Copy Trading & PAMM Strategy Platform (MT5)

Tech Stack: React.js, Node.js

- Resolved bugs across the admin panel and user modules to improve platform stability and reliability.
- Diagnosed and fixed critical issues within the copy trading engine, ensuring accurate trade replication across accounts.
- Supported ongoing maintenance of MT5-based copy trading and PAMM strategy functionality.

Bixverse — Spot Trading Application

Tech Stack: Node.js, MongoDB, Redis

- Worked as backend developer across the spot trading module, covering user-to-user trading and Bybit integration.

- Built and optimized the order matching and order placement engine for user-to-user spot trades.
- Integrated Bybit APIs for trade execution and account synchronization.
- Identified and resolved bugs to improve the reliability of trading operations.

Sonotrade — Prediction Market Platform

Tech Stack: Next.js, Node.js, Fastify, MongoDB, Redis

- Analyzed Polymarket's architecture to inform the design of the platform's order matching system.
- Designed and implemented the event market architecture.
- Developed the order matching engine and wrote unit tests using Jest to ensure system reliability.

Pagar — Crypto Staking Platform

Tech Stack: Node.js, Web3.js, Alchemy

- Implemented staking plans, purchase flows, and ROI return calculations.
- Built a multi-level referral system to support user acquisition and rewards.
- Integrated a custodial USDT wallet, including deposit and withdrawal functionality via Alchemy webhooks.
- Implemented Web3-based wallet address generation and managed fund movement and withdrawal processing.

Predictx — Prediction Market Platform

Tech Stack: Next.js, Node.js, Fastify, MongoDB, Redis

- Built a prediction market platform using an event market architecture and trading system similar to Polymarket.
- Integrated the UMA Optimistic Oracle for market initialization and event resolution.
- Developed automated crypto event creation and resolution workflows, modeled on Polymarket's crypto markets series.
- Implemented sports prediction markets following a Polymarket-style structure.
- Built a Polymarket event mirror module that pulls live events from Polymarket and syncs them to the platform in real time.

Incuflex — Incubator & Startup Program Management Platform

Tech Stack: React.js, Node.js, PostgreSQL

- Built a B2B SaaS platform enabling incubators to manage startup programs, bringing founders, mentors, judges, and investors into one shared workspace.
- Implemented multi-tenant architecture with separate subdomains per incubator, each with its own isolated set of startups and users.
- Developed the platform's three core flows: Competition, Idea Bank, and Incubation, and worked across all portals (founders, mentors, judges, investors).
- Led development of the Competition and Idea Bank flows end-to-end, covering idea submissions, pitch competitions, and evaluation workflows.
- Contributed to the Incubation flow, supporting mentor session scheduling, funding tracking, and startup growth measurement.

Tradedge — Trading Analytics & Playbook Platform

Tech Stack: Next.js, Material UI

- Developed a trading application aggregating trading data from multiple platforms, including MT4 and MT5.
- Implemented a Playbook section containing trading strategies and risk management techniques.
- Added private/public profile visibility controls for user trading accounts and data.
- Implemented a responsive dark/light theme toggle using React.js, with persistent theme settings via local storage.

E-commerce Platform

Tech Stack: React.js, Node.js, Express.js, MongoDB

- Developed detailed product listing pages with descriptions, images, and pricing.
- Implemented shopping cart functionality and a secure, streamlined checkout flow.
- Built user account functionality including order tracking and profile/preference management.

TECHNICAL SKILLS

Languages: JavaScript, HTML5, CSS3

Frontend: React.js, Next.js, Bootstrap, Material UI, Responsive Web Design, Context API

Backend: Node.js, Express.js, Fastify, REST API Development

Database: MongoDB, Redis

Blockchain/Web3: Web3.js, Alchemy, Wallet Integration, Crypto Payments (USDT)

Testing: Jest, Unit Testing

Tools: Git

EDUCATION

Bachelor of Engineering — SACS MAVMM Engineering College

2018 – 2022 | CGPA: 7.9

HSC — Pasumalai Higher Secondary School

2017 – 2018 | 77%

SSLC — Pasumalai Higher Secondary School

2015 – 2016 | 90%

CERTIFICATION

Full Stack Development — Ace Software Training Academy

Certificate Number: ATSM-2343
